1. Introduction

Application Selected: Duolingo

Category: Education / Language Learning

Platform: Android and iOS

Purpose: Learn languages through short, interactive lessons and practice activities.

Design goal: Make language learning simple, engaging and motivating.

2. What is UI?

UI (User Interface) means the visual elements that users see and interact with in an application.

Examples:

- Buttons and icons
- Colors and typography
- Illustrations
- Progress bars
- Lesson cards
- Navigation elements

3. Duolingo UI Features

Color: Green is strongly associated with Duolingo's visual identity.

Typography: Clean, friendly and readable text.

Icons: Simple icons for lessons, hearts/lives, rewards and navigation.

Buttons: Large, clear action buttons make lessons easy to follow.

Layout: Card-based lesson structure with visible progress.

Illustrations: Friendly graphics make the interface more engaging.

4. What is UX?

UX (User Experience) means how easy, useful, comfortable and satisfying an application feels when a user interacts with it.

A good learning UX helps the user:

- Start a lesson quickly
- Understand each question
- Receive immediate feedback
- Track learning progress
- Stay motivated to continue

5. Duolingo UX Features

- Simple onboarding and language selection
- Short lesson flow reduces learning effort
- Immediate feedback after answers
- Gamification through XP, streaks and rewards
- Progress tracking encourages regular practice
- Notifications remind users to practise
- Familiar visual patterns reduce the learning curve

6. UI vs UX in Duolingo

UI Element → UX Benefit

Green visual identity → Recognizable brand

Lesson cards → Easy content discovery

Progress indicators → Shows learning progress

Answer buttons → Simple interaction

Animations / illustrations → More engaging experience

Rewards and streak indicators → Motivation to continue

7. Strengths of Duolingo Design

1. Simple and friendly interface
2. Highly engaging learning experience
3. Strong use of gamification
4. Clear and immediate feedback
5. Easy progress tracking
6. Consistent visual design
7. Short lessons support quick practice

8. Weaknesses / Areas for Improvement

1. Frequent notifications may feel distracting.
2. Repeated exercises can sometimes feel monotonous.
3. Many game-like elements may overwhelm some users.
4. Advanced learners may want more flexible learning options.
5. Some users may prefer more real-world conversation practice.

9. Suggested Improvements

Improvement 1: Give users stronger control over notification frequency.

Improvement 2: Add more variety to repeated practice activities.

Improvement 3: Provide a clearer advanced-learning mode.

Improvement 4: Add more real-life conversation and speaking scenarios.

Improvement 5: Improve customization of learning goals and practice difficulty.

10. User Journey Example

Goal: Complete a language lesson

Step 1: Open Duolingo

Step 2: Select / continue a language course

Step 3: Choose the next lesson

Step 4: Answer questions

Step 5: Receive feedback

11. UX Evaluation
